

Steel plate for for Boiler Pressure Vessel DIN17165 HI

HI steel plate, DIN17165 HI steel plates is a kind of material for boiler and pressure vessel steel. DIN17165 HI steel plates is characterized by a minimum yield strength of 170-230MPa and by good weldability, so HI steel is mainly used to for manufacturing boilers, pressure vessels and pipes transporting hot liquids. the following are DIN17165 HI steel plate's Chemical composition and mechanical properties

If you are looking for Chinese HI steel supplier, if you want to know HI steel price, please be free to contact us.
