

Steel plate for for Boiler Pressure Vessel DIN17165 HII steel

HII steel plate, DIN17165 HII steel plates is a kind of material for boiler and pressure vessel steel. DIN17165 HII steel plates is characterized by a minimum yield strength of 185 - 265 MPa and by good weldability, so HII steel is mainly used to for manufacturing boilers, pressure vessels and pipes transporting hot liquids. the following are DIN17165 HII steel plate's Chemical composition and mechanical properties.

If you are looking for Chinese HII steel supplier, if you want to know HII steel price, please be free to contact us.
