

## Steel plate for for Boiler Pressure Vessel NFA 36-205 A37 CP

A37 CP steel plate, NFA 36-205 A37CP steel plates is a kind of material for boiler and pressure vessel steel. NFA 36-205 A37 CP steel plates is characterised by a minimum yield strength of 170-230MPa and by good weldability,so A37 CP steel is mainly used to for manufacturing boilers, pressure vessels and pipes transporting hot liquids.the following are NFA 36-205 A37CP steel plate's Chemical composition and mechanical properties
