

Steel for Boilers and Pressure Vessels

Pressure vessel and boiler quality steel are commonly used throughout the oil industry (including inshore and offshore), the petrochemical industry and the gas production industry. Steel for Boilers and Pressure Vessels contains:Low-temperature low-alloy steel for pressure vessel, normal temperature pressure uses the steel,Quenched and tempered high strength steel plates for pressure vessels.

The delivery condition of Boilers and Pressure Vessels Steel are: Normalize, annealing,tempering,TMCP,PWHT, impact test,Q&T.

The main steel grade of Pressure vessel and boiler quality steel are :

EN 10028-2: P235 GH, P 265 GH, P 295 GH, P 296 GH, P 355 GH
