Henan BEBON international co.,ltd**Steel plate for for Boiler Pressure Vessel DIN17102 St E 355steel**

St E 355 steel plate, DIN17102 St E 355steel plates is a kind of material for boiler and pressure vessel steel. DIN17102 St E 355 steel plates is characterized by a minimum yield strength of 280-355 MPa and by good weldability, so St E 355 steel is mainly used to for manufacturing boilers, pressure vessels and pipes transporting hot liquids. the following are DIN17102 St E 355steel plate's Chemical composition and mechanical properties.

If you are looking for Chinese St E 355 steel supplier, if you want to know St E 355 steel price, please be free to contact us.
